How to read this report

Amounts & review

Amounts come from suggestions or customer input. A customer review is not independent verification by Vitali Web Tools. Unknown amounts are excluded from the sum, never treated as zero.

Originals & completeness

All receipt pages are retained, including equal amounts. A draft combined PDF starts with a clearly marked control sheet, separate from numbered receipt pages. Check numbering against the originals. Document-level metadata and bookmarks are not preserved.

Keep the package private

Downloaded PDFs and ZIP files are not encrypted. The CSV register and JSON manifest contain the same amounts and source mapping. Store and share these files with care.
